FOREWORD

The twelve-year program of Education in Citizenship fostered by this Department through the Social Studies marks a new departure in the field of History and Social Science. The present aim is to develop **thinkers** and **doers**, instead of **reciters**. This means that the new aims and the new methods call not only for good textbooks, but for much collateral material—books, magazines, reports, maps, charts, and the like. We have come to group all this under the term “book laboratory.”

Textbooks alone, valuable as they are, will not do. There must be plenty of reference material within easy reach of teacher and pupil. Books and other reference material are the **tools** of the teaching process, to be used daily throughout the school year. And it is of the utmost importance that these tools be known to the teacher, and be at hand in the schoolroom, so that the pupils may acquire a **habit** that will prepare them for self-education in later life. This is indispensable in Citizenship Education, for which the schools are in large degree responsible.

This bibliography was prepared by Dr. J. L. Barnard to meet the demands of the teachers of junior high History and Civics. Many of the titles listed will be in daily use, and should therefore be available within the school. Others may be found in the public libraries.

September 5, 1925.

FRANCIS B. HAAS,
Superintendent of Public Instruction.

HOW TO ORDER LIBRARY BOOKS

It is advisable to order library books through the nearest large book dealer. A discount of at least fifteen per cent of the list price is usually allowed. Books which are likely to receive hard usage, such as fiction, should be bought in re-enforced binding. This will result in ultimate saving of rebinding and mending costs. Re-enforced or resewed books far outlast those in ordinary publishers' binding and are thus cheaper in the end. The order list should give author, title and publisher. It is not necessary to state the price as this changes frequently.
